Revaluation of Consumption Prerequisites: ML + Actual Costing active. With Revaluation of Consumption functionality, you can adjust the single-level consumption values in actual costing with the periodic unit price in all value records, if the Revaluation of Consumption step is run during ML closing (CKMLCP - Post Closing step).

Actual Costing - Revaluation of Consumption in SAP S/4HANA

On the other hand, the standard price does not take into account any actual procurement costs, which can be a problem, for example, with externally procured materials with highly variable prices. For these reasons, SAP recommends the valuation of materials at the moving average price only in the case of raw materials and trading goods. For semifinished and finished products, you should choose valuation at the standard price.
