Chinese Architecture In An Age

The most famous architectural achievement of the ancient Chinese is undoubtedly the Great Wall of China, largely built during the reign of Qin Emperor Shi Huangti in the closing decades of the 3rd century BCE. The wall incorporated many stretches of older defensive walls and was extended again during the Han dynasty using stone and bricks.

Chinese architecture - Wikipedia

The date of the earliest evidence of architecture or urbanism in China is determined by one's definition of a building or a city. The physical evidence of cities is earlier than evidence of individual buildings, probably because buildings were made of perishable materials whereas city walls were constructed of rammed earth.
