I'm excited to announce that the SANS FOR610: Reverse-Engineering Malware course I co-author with Lenny Zeltser now uses Ghidra for static code analysis. Ghidra is a free and opensource software (FOSS) reverse engineering platform developed by the National Security Agency (NSA). It has an active community of users and contributors, and we are optimistic about the future of this analysis tool.

My Opinion of SANS' FOR610 ... As I initially mentioned at the start of this post, the passing of the GREM exam as well as the above referenced conversation really got me thinking again about my own current certifications, which ones I wanted to bother keeping, and which ones I still have a personal desire to complete. ...

Detroit Dave's Raves: Passed the GREM exam

GREM was a really tough course with a lot of information to take in. I scored a 71 or 72 on my first practice test and a 84 or so on my second. I ended up passing the exam with an 80. After the first practice test I really revamped my index and added A LOT of info. I think my index was around 1500 entries.
