### Genet

A genet (pronounced / 'dʒɛnɪt / or / dʒə'neɪt /) is a member of the genus Genetta, which consists of 14 to 17 species of small African carnivorans. The common genet is the only genet present in Europe and occurs in the Iberian Peninsula and France.

### Genet (animal) - Wikipedia

Genet, any of about 14 species of lithe catlike omnivorous mammals of the genus Genetta, family Viverridae (order Carnivora). Genets are elongate short-legged animals with long tapering tails, pointed noses, large rounded ears, and retractile claws.

### Genet | mammal | Britannica

Genets are long, lean carnivores that appear catlike with a tail usually as long as (if not longer than) the body. There are

approximately 14 species identified all of which vary in appearance and habitat. The small-spotted genet, found in more arid regions, is recognized by a prominent dorsal crest running from shoulder to tail.

## **Genet | African Wildlife Foundation**

Genets are growing in popularity as exotic pets due to their beautiful patterns. They look a lot like kittens with the pointy face of a ferret, the spots of a cheetah, and the tail of a lemur. They are distantly related to both cats and ferrets but are closely related to the mongoose and civet. There are 14 species of genets.
