This extra-large preserved grass frog has a body length of 4.5"

File Type PDF Injected Frog Dissection Guide With Pictures

to 5.5" and is an excellent dissection specimen. Arteries are injected with red latex and veins are injected with blue latex to easily trace the vascular system. The large size and injected vessels of this preserved grass frog specimen make it superior for frog dissections.

Frog, specimen, grass, 4.5"-5.5", double injected

The frog, although an amphibian, is a good representative of the vertebrates and may be the only vertebrate that many people examine closely both externally and internally. This dissection and the information gained will add to the student knowledge of comparative anatomy when combined with the information from the earthworm and crayfish.
