Amazon.com: weber carburetor

DCNF Weber Carburetors The DCNF is a synchronous-opening, 2-barrel, down-draft carburetor, Despite its compact size, it is capable of high rates of flow. Interchangeable venturi and accelerator pump cams add to the versatility of these units, which are particularly useful in applications where engine compartment limitations dictate a compact-size carburetor.

Weber 45 DCOE Carburetor Notes When fitting a 45DCOE to the B series engine, a special manifold will be required. The carb itself is mounted on synthetic rubber O-rings ("Thackeray washers") which absorb vibration and prevent the air-fuel mixture from being disturbed. A steady rod should be made up and connected to the rear engine plate.

Laine Family Web Site

Weber pioneered the use of two-stage twin-barrel carburetors, with two venturis of different sizes (the smaller one for low-speed running and the larger one optimised for high-speed use). In the 1930s, Weber began producing twin-barrel carburetors for motor racing, where two barrels of the same size were used. These were arranged so that each cylinder of the engine had its own carburetor barrel.
