Maxima Tutorial

Maxima accepts real and complex numbers.

Real numbers

inMaxima can be

integers, rationals,

such as $3/5$, orfloating-

point numbers, for

instance, 2.56 and

$25.6e-1$, whichis a

short notation

for 25.6×10^{-1} .

Irrational numbers,

Where To Download Maxima Tutorial

such as $\sqrt{2}$ (square root of 2) or $\log(2)$ (natural logarithm of 2) are left in that form, without being approximated by floating-point numbers, and later calculations, such as $\sqrt{2}^2$ or $\exp(\log(2))$ will lead to the exact result 2.

Dynamics and Dynamical Systems - Maxima Tutorial

Maxima distinguishes lower and upper case.

Where To Download Maxima Tutorial

All built-in functions have names which are lowercase only (sin, cos, save, load, etc). Built-in constants have lowercase names (%e, %pi, inf, etc). If you type SIN(x) or Sin(x), Maxima assumes you mean something other than the built-in sin function. User-defined functions and variables can have names
