closed-chain planar robots, and geared transmission.

## **Kinematics of Mechanisms and Machines - Course**

3.2 Kinematics and  
Dynamics of  
Mechanisms.

Kinematics of mechanisms is concerned with the motion of the parts without considering how the influencing factors (force and

mass) affect the motion. Therefore, kinematics deals with the fundamental concepts of space and time and the quantities velocity and acceleration derived there from. Kinetics deals with action of forces on bodies. This is where the the effects of gravity come into play.
