Human migration is the movement of people from one place to another with the intentions of settling, permanently or temporarily, at a new location (geographic region). The movement is often over long distances and from one country to another, but internal migration is also possible; indeed, this is the dominant form globally. People may migrate as individuals, in family units or in large groups.

Human migration - Wikipedia

Remittances sent by migrant workers to developing countries have soared in the past two decades. According to the World Development Indicators, workers' remittances to developing countries were just US\$47 billion in 1980 (in constant 2011 dollars).
