Maldives: Greater Male Environmental Improvement and Waste ...

Solid waste management now benefits 900 people on the island of Uikulhas. Solid waste is the most visible environmental threat to the Maldives. The management of solid waste is especially challenging due to the small island sizes, small population on the islands and lack of economic activities. With a population spread across the island chain there is little scope for harnessing economies of scale due to large costs of transportation and low volumes, making the costs of service delivery high.
